10/081,029

**B. AMENDMENTS TO THE SPECIFICATION**

Applicants respectfully request amendment to the specification as follows:

[0170] Referring now to FIG. 8, there is depicted a flow diagram of a signal flow and processing of a call in accordance with the method, system, and program of the present invention. A standard telephone device is assumed for the [[A]] "tel"[[@]] origin device and destination device in the present example. However, a similar signal flow may be applied other types of origin and destination devices, including server systems, private switching networks, and call centers. Further, the flow is described with reference to wireline devices, however, is not limited in application to wireline devices.
